

## **MACCHINA RULLATRICE PER BORDI**

*Non è un'invenzione della pubblicità, ma il frutto di anni di ricerca al servizio dell'innovazione tecnologica.*

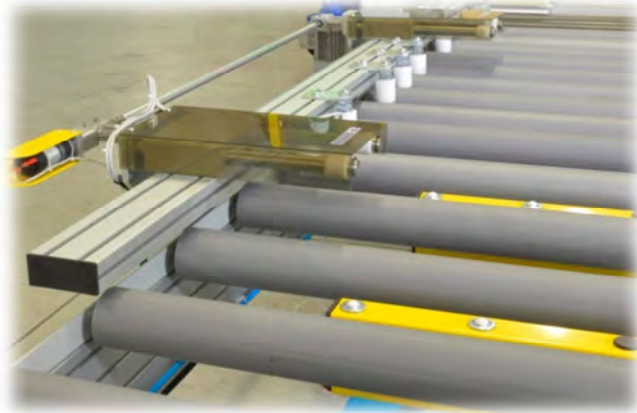

The Edges roller coating machine ,was made for the application of any type of glaze, in bands with different widths, on the edges of the glasses. The following are the main features and peculiarities of the New Edges Roller Machine.

### 1. ROLLER CONVEYORS

- Automatic feed of the slab through motorized rollers with possibility to vary, through the Touch Screen, the speed of production;
- Lifting bench with spheres , which guarantee a perfect lifting of the glass and providing easy handling of the same, all the rollers are perfectly straight
- On the opposite side of the glazing head are provided a series of retractable wheels for possible support of a larger plate, also safeguard the safety of operators

- Automatic attestors for the glass, adjustable by touch screen , to determine the width of the border to be coated with a perfect zero point

### 2.ELECTRONIC MANAGEMENT

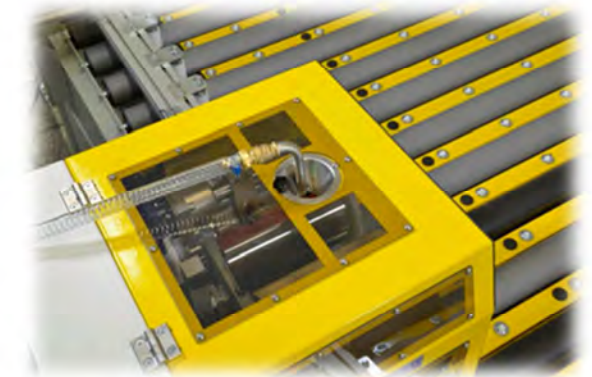

-The machine is complete with electrical panel with PLC and dedicated software, controlled by a touch screen keyboard. For to facilitate the operator, depending of the size of the glass, the keyboard can be movable easily from left to right of the transport,

### 3.HEAD UNIT

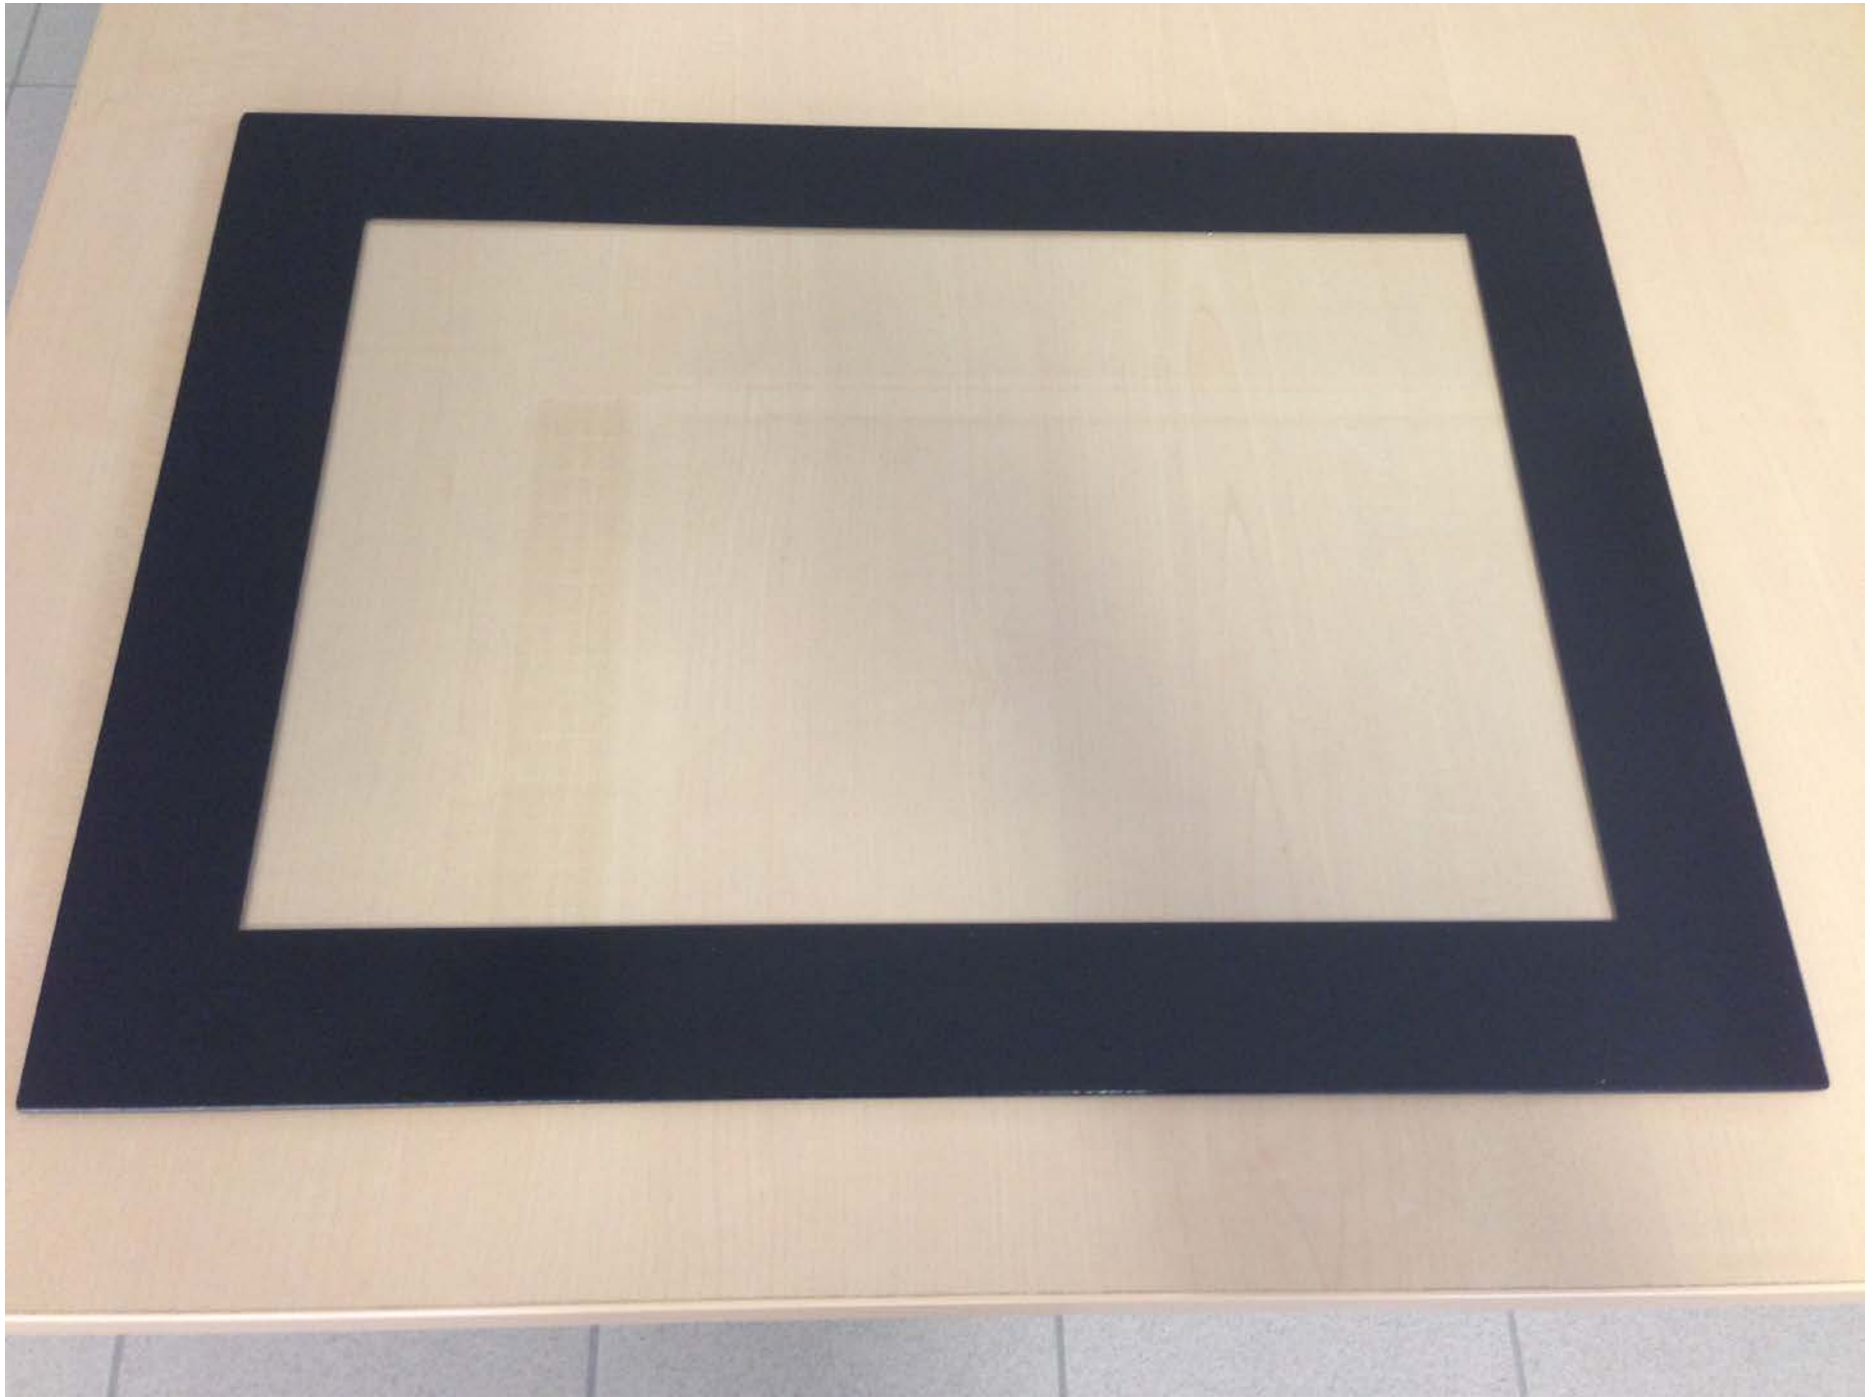

All the rollers can be moved independently in every direction, with decimal adjustments for each necessary fine displacement during the processing, this means :

- Precision adjustment to ensure perfect homogeneity of distribution of the glaze on the application roller;
- Adjustment and precision, of the height of applicator roller and the metering roller, adjustable by touch screen;
- Automatic independent adjustable speed of the applicator roller and metering roller, managed through touch screen

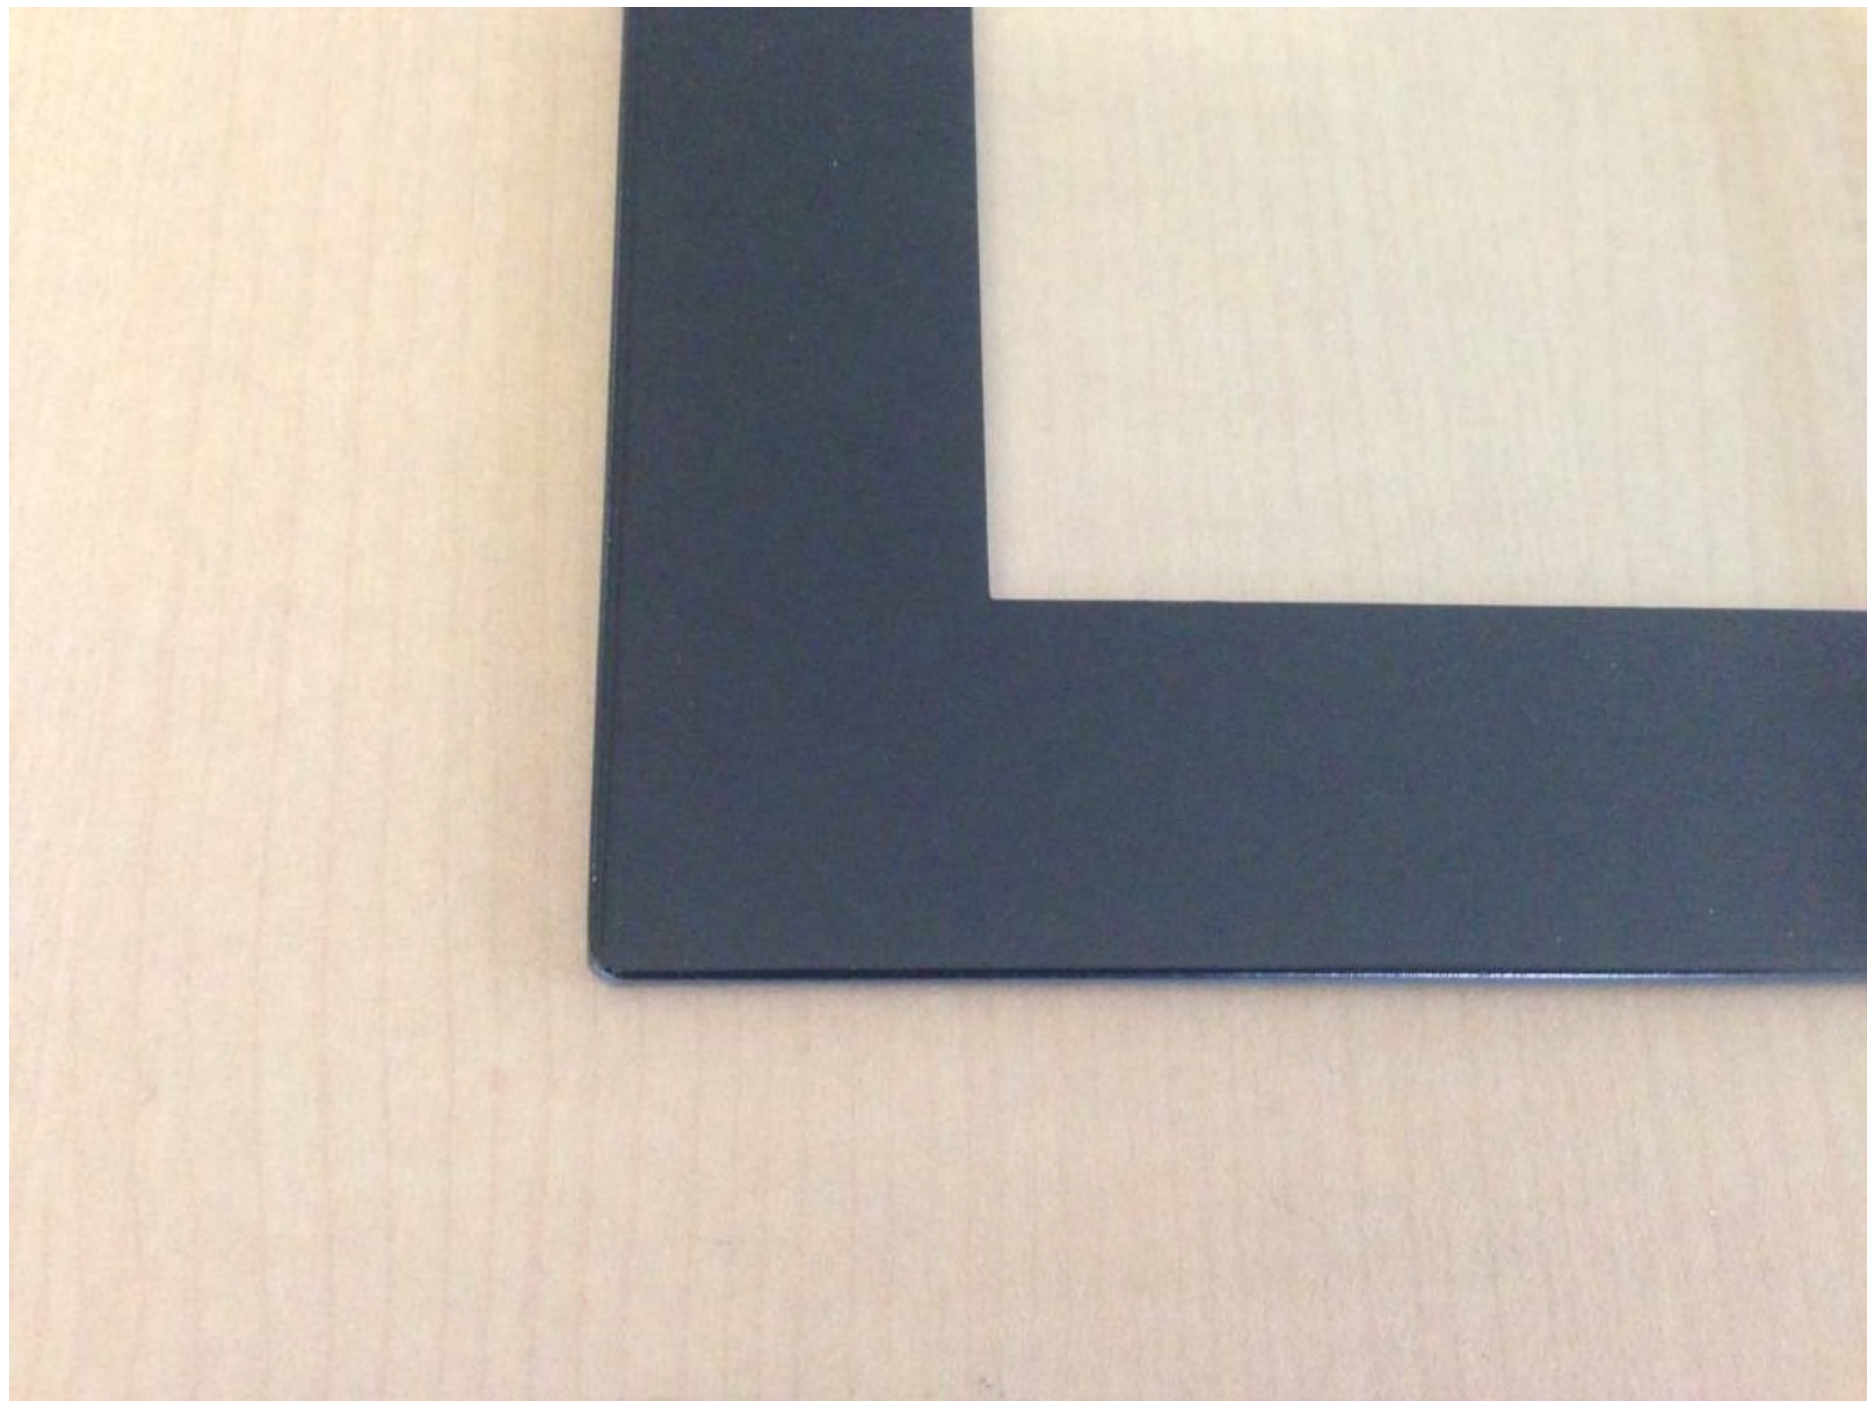

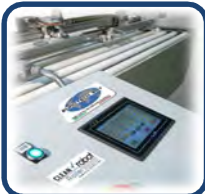

The head has devices to safeguard the health of the operators was designed so that the feeding of the enamel can be done in automatic or manual mode with the cover closed thus avoiding any possible contact with the operator.

### CLEAN ROLLER ROBOT

- Robots for cleaning and polishing of fused silica rollers for glass tempering furnaces

### SCREEN PRINTING MACHINES

### DRYERS

### EDGES ROLLER COATING MACHINE

### ROLLER COATING MACHINE

ROLLER CONVEYORS TRANSPORT, SQUEEGEES SHARPENING MACHINE, LIFTING BENCHES, CONVEYORS BELT, MANUAL SCREEN PRINTING TABLES AND MUCH MORE
