

AUTOMATIC SCREEN PRINTING MACHINE

*It is not an invention of the advertising, but the result of years
Research at the service of technological innovation.*

This new series of automatic screen printing machines, is highly flexible
 The modular system allows its use without limitations of size printing.
 In addition, each model has its range of sizes very wide from the minimum and maximum sizes , just think that the same model of machine for maximum size, 1800x2500 can be print up to minimum size 40x500mm without loss productivity.

1. PRINTING SYSTEM MOBILE BRIDGE,

The most innovative part is definitely the printing system to the mobile bridge, thanks to which, the operator is no longer located in front of structural obstacle.

2.GROUP OF TRANSPORT

- The transport system can be with belts or band according to the sizes to be treated;
- In the band version ,the glass can be positioned and centered close to operator to facilitate the operations

Belts Transport

Frontal Lock

Band Transport

Adjustable by operator interface depending of the glass tickness

3.SCREEN SUPPORT GROUP

Locking of screen by pneumatic cylinders

4. INTERFACE OPERATOR

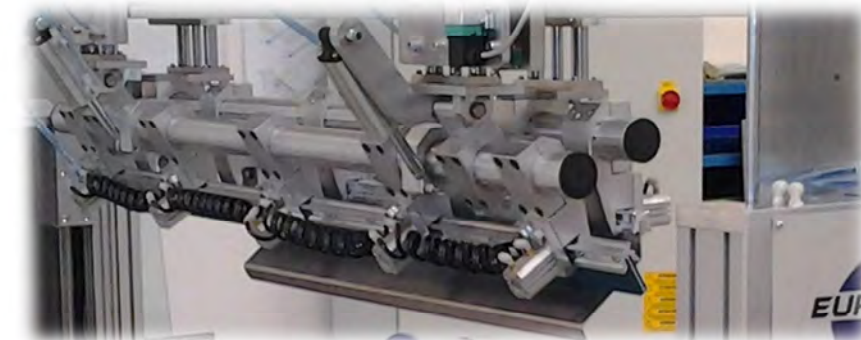

- Automatic adjustment of up and down of the screen support , automatic positioning of height of the screen depending on the thickness to be printed
- Out of contact with new system compensation device
- Automatic adjustment of the screen to compensate the detensioning of the screen suffered in the time and guarantee an equidistance between the drafting scraper and the screen thus obtaining a homogeneous and perfect drafting.
- Every adjustment is made by operator interface from which you can store and recall the working recipe

5. SUPPORT SPATULAS UNIT

- Automatic adjustment of the pressure of the writing spatula , depending on the thickness of the glass to be printed
- Locking-spatulas by pneumatic cylinder
- Anti-drip system

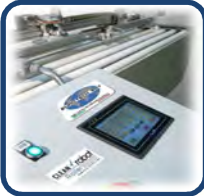

EUROTECH WAY
High tech for the industrial machinery

MSP 2500
green finishing
medium

CLEAN ROLLER ROBOT

- Robots for cleaning and polishing of fused silica rollers for glass tempering furnaces
